Earthsong Meadow Section

This section will be designed as a self seeding wildflower and natural grass meadow. Native shrubs can be planted where possible. Graves in this section will be designed to accommodate one biodegradable casket, container or shroud and one biodegradable urn of cremated remains or two biodegradable urns of cremated remains.

What is Natural Green Burial?

Green burial is a burial practice that aims to return remains to the earth as quickly and naturally as possible with limited impact on the surrounding environment. Natural green burial of the body forgoes traditional embalming, cement outer burial containers and requires that caskets, containers and shrouds are made from materials that are non-toxic and readily biodegradable. Cremated remains are to be placed directly into urns that are made of biodegradable materials.

What interment options are available in Earthsong Meadow?

Graves in this section can accommodate one biodegradable casket, container or shroud burial and one biodegradable urn of cremated remains or two biodegradable urns of cremated remains. Scattering is not permitted within the Natural Green Burial Area.

What memorialization options are available?

To preserve the natural surroundings we do not permit placing tokens of remembrance like photographs, flowers or stuffed animals, however one naturally occurring, local granite boulder not more than 360 square inches in size may be inscribed and used to mark a grave in the Natural Burial Area. There is no obligation to have a memorial in the Natural Burial Area.

A limited number of designated double lots can be planted with a memorial tree. Memorial trees can be selected from a preapproved list of native tree species.
